

New Year's Resolution: Save Time with BoviSync

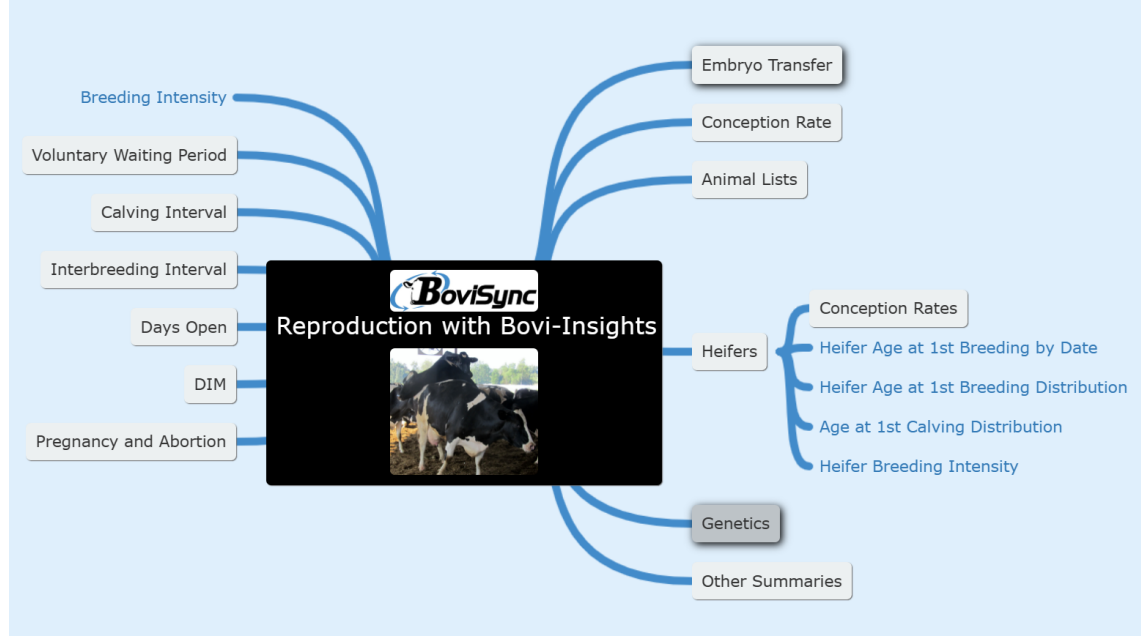

Bovi-Insights provides the most advanced analytics available for dairies to manage cows. Producers are saving time with reports that deliver the information they need. Any report can be reloaded from a menu or a url. Features such as quick filters, grouping, and the ability to enter events from selected cows reduce time in the office and improve decision making.

Recently a customer asked for help creating a report for multiple parlors. By updating the pen tables, the "Barn" item allows this report to be helpful for farms that want to do comparisons by location: [Herd Demographics Summary Report- BoviSync](#)

We continue to add Bovi-Insight Reports to the [Report Map](#). Use this to find new insights in different categories.

Dairies should reach out to support for questions on reports.

BoviSync in the News

Read how Fir Ridge Holstein manages two sites: [Manage Cows on Multiple Locations \(bovisync.com\)](#). "We can access the data from either dairy from anywhere; and the program allows us to view data from either dairy individually or both dairies combined, which is extremely helpful," Scott Ruby.

Office / Support Hours

BoviSync wishes everyone a joyful Holiday. Our office will be closed on December 24th to observe the Christmas holiday and on December 31st. We will not be answering phone calls. Any voicemails or messages will be reviewed as soon as possible.

Merry Christmas - Happy Holidays from BoviSync

We are grateful for the opportunity to serve dairies all over the world with work and data management. Most importantly we are blessed to work with you. The impact that we have together helps feed the world.
