

## Mobile News- Multi-herd Login Released

Bovisync mobile app now features the ability to login into multiple herds at once. If you work with more than one location in Bovisync, it is possible to have each location on the phone. All farms that have granted permission to the user logged into the phone will be available to add.

Dairy managers and breeders working across multiple sites found logging in and out of the app to get to different herds inconvenient. Multi-herd login became a frequent request as we've grown. Being able to access numerous herds without leaving the mobile app saves significant time for many users of Bovisync. Technicians that work across multiple farms enter data from the mobile app effortlessly.

To add a farm to your mobile app, choose "switch herd" by scrolling to the bottom of the menu in the upper right corner of the app. The herd list will have the option to "add herds" at the bottom.

### Tell Us!

Got ideas for a feature that you need to manage your dairy? Make a request!

## Upcoming Training Webinars

We provide regular training targeted toward new users of Bovisync. Technicians and consultants without prior experience in Bovisync should consider signing up for training. Scott and Pedro are happy to answer any questions that come up.

We add trainings regularly- please check back in the future:

[May 25 @ 1 CT](#)

### Bovisync Basic Training

Pedro Ibarra

Implementation Consultant

This presentation covers the mobile app, adding permission to your account, pairing scanners to your mobile app, and adding EIDs to pair for newborns. New employees and technicians can learn how to use the application to perform their job.

Did you know that phones and RFID wands are setup for your farm when purchased from us? When dairies purchase directly from us we are able to setup devices for you. Not only does this save some time, it helps identify issues before equipment even gets to the dairy. For recommended mobile phones and rfid readers call us or [email us](#).
